

Environmental Policy

We know that our design, manufacturing and supply activities have an impact on the environment, and we have a duty to manage that impact in a responsible and ethical manner. At Glazing Vision, we integrate environmental considerations into everything from product design and manufacturing resources to disposal at end of life.

We are committed to:

- Engaging with our suppliers to improve relationships and influence our environmental impact
- Designing products with their environmental lifecycle in mind, including their energy performance, product sustainability and resilience and future disposal at end of life
- Demonstrating compliance to relevant environmental legislation and fulfilling our compliance obligations
- Prevention of pollution and to protect the environment in which we operate by pursuing initiatives to reduce, manage or mitigate the impact of our activities, including the use of sustainable resources
- Actively supporting and developing all staff throughout the business to implement and improve our environmental management systems
- Establishing and monitoring annual environmental objectives to drive improvements in environmental performance, including the calculation of our carbon emissions
- The ongoing measuring, monitoring and reviewing of processes, including root cause analysis and implementation of corrective and preventative measures to demonstrate continual improvement and development of our processes, products and people
- Maintaining accreditation for our environmental management system
