

Fall of rain sensor will be away from the hinge at 45° angle to the horizon
Adjustable mounting bracket powder coated to external rooflight colour

4 core cable (black)

Plan View of Skylight

When a rain sensor is required the customer is to specify a mounting position at time of order to maximise exposure to the elements and avoid being in the rain shadow of the building.

There are three positions for the rain sensor. Either rooflight mounted (positions 1 and 2) or externally mounted with flying lead (position 3)

External keypads are always remotely mounted and supplied with flying leads

Refer to 601-ASS-407 for extending the keypad cable (if required)

NOTE: The rain sensor and keypad are optional extras
